

## The Final Countdown – One World Government Part 4

“In the 18th-century in England, a vagabond was exhausted and famished, when he came to a roadside inn with a sign reading, ‘George and the Dragon.’ So the hungry man knocked on the door of the inn.

At this, the innkeeper’s wife stuck her head out a window, so the vagabond asked, ‘Could ye spare some porridge?’

The woman took one look at his shabby, dirty clothes and shouted, ‘No!’

Then the man asked, ‘Well then, could I have a pint of broth?’

And without missing a beat the woman yelled back, ‘No!’

Undaunted, the vagabond now requested, ‘Could I at least use your washroom?’

But the woman just shouted back again, ‘No!’

Well at this the vagabond said, ‘Might I please...?’

‘What now?’ the woman screeched, not allowing him to finish.

‘D’ye suppose,’ he asked, ‘that I might have a word with George?’”

Get it? George and the **Dragon**? Okay, you didn’t get that one either! But here’s the point. That lady was not only rude, but man, she wasn’t even open to any kind of requests for help, was she? Not at all! Man! You talk about stubborn! But that’s right folks, believe it or not, that lady’s not alone. You see, the Bible says one day the whole planets going to be just as stubborn as that lady because God’s been **requesting to help us** and save us

from the Wrath to come for over 2,000 years...but we won't listen! We're just like that lady! "NO!" And so one day people, the Bible is clear, if we persist, we're going to be thrust into the Antichrist's kingdom, which Jesus says is the worst time in the history of mankind! You will have wished you had said YES! And that all begins of course at the rapture of the Church! And folks, the reason why it's going to be such a **nightmarish time** is because for those who refuse to accept Jesus Christ as their Personal Lord and Savior they'll be catapulted into the 7-year Tribulation and its not a joke. It's an outpouring of God's wrath on a wicked and rebellious planet. In fact Jesus said in **Matthew 24** it's going to be a "time of greater horror than anything the world has ever seen or will ever see again. And that "unless that time of calamity is shortened, the entire human race will be destroyed." But praise God, God's not only a God of wrath, He's a God of love as well. And **because He loves you and I**, He's given us many warning signs to show us when the Tribulation was near and when Jesus Christ's 2<sup>nd</sup> Coming was rapidly approaching.

Therefore, in order to keep you and I here at Sunrise from experiencing the ultimate bad day of being left behind, even worse than speaking with a Dragon Lady, we're going to continue in our series **The Final Countdown**. And so far we've already seen how the **#10** sign on **The**

**Final Countdown** was **The Jewish People**. The #9 sign was **Modern Technology**. The #8 sign was **Worldwide Upheaval**. The #7 sign was **The Rise of Falsehood**. The #6 sign was **The Rise of Wickedness**. The #5 sign was **The Rise of Apostasy**. The #4 sign was **The Rise of A One World Religion**. And the **last three times** we saw how the #3 sign was the Rise of **A One World Government**. And what we saw there was that God lovingly foretold you and I that when we see **all the world's governments** on the planet coming together as one, which is happening right now today all over the world, and we saw that with the **Chronological** proof, the **Administration** proof, the **Quotation** proof, the **Tactical** proof, and **last time** with the **Control** proof where we saw that the Antichrist is going to control the whole planet and everything we do, with our **Food Supply**, and our **Water Supply**, and even **Health Supply**. Why? Because he's going to **force us**, and **make us**, and **order us** to do whatever he says, including taking his mark, in the right hand or forehead. And folks, that time is now! Which means, we're living in the Last Days!

But that's still not all. The 7<sup>th</sup> **proof** that we know really are headed for a One World Government is what I call the **Monitor Proof**. That's right, the Big Eye in the Sky! I'm talking about **Big Brother**. You see, the Bible's clear. We're not just headed towards an evil deceptive Antichrist Kingdom

that exerts total control over the whole planet, but he's able to **ensure** control by developing a Big Brother system that monitors everything on the planet! And I mean everything! But don't take my word for it. Let's listen to God's.

**Revelation 13:11-18** “Then I saw another beast, coming out of the earth. He had two horns like a lamb, but he spoke like a dragon. He exercised all the authority of the first beast on his behalf, and made the earth and its inhabitants worship the first beast, whose fatal wound had been healed. And he performed great and miraculous signs, even causing fire to come down from heaven to earth in full view of men.

Because of the signs he was given power to do on behalf of the first beast, he deceived the inhabitants of the earth. He ordered them to set up an image in honor of the beast who was wounded by the sword and yet lived. He was given power to give breath to the image of the first beast, so that it could speak and cause all who refused to worship the image to be killed.

He also forced everyone, small and great, rich and poor, free and slave, to receive a mark on his right hand or on his forehead, so that no one could buy or sell unless he had the mark, which is the name of the beast or the number of his name. This calls for wisdom. If anyone has insight, let him calculate the number of the beast, for it is man's number. His number is 666.”

Now folks, if you were here last week, we saw how the Bible clearly says that the False Prophet in the Last Days is **not only** going to dupe the whole world into **worshipping** the Antichrist, but he's what? He's going to **make** them, he's going to **order** them, he's going to **cause** them, he going to **force** them to do whatever he says to do, otherwise they will what? They will **die**, right? And again I want to focus this week on the key words there, “make” “order” “cause” and “force.” In the Greek they literally mean, “to

carry out, to command, to direct or to execute.” And so this implies that we have some serious **enforcement** going on here! In fact, it’s **global** enforcement because again, that’s the context. It’s **global**. He forces the whole planet to do whatever in the world he wants them to do. And so here’s the point. In order to pull this off, think about it, you not only need some **serious control** over the whole planet, but you better have some serious ability to **monitor** everyone on the whole planet, right? Why? Because think about it! Trying to control the whole planet is a huge task for a guy! Ladies, we guys can’t even find our socks in the drawer, right? And so here’s the point. How are you going to find and **enforce** everyone on the planet to do your will, right? I mean, how are you going to **micro-manage** the whole planet, because that’s what’s going on here, into doing what you say? Because here’s the facts. You know there’s going to be a whole lot of resisters! I mean, even if you grab control of the food and water and health care, as we saw last time, people are still going to **resist**. They’re still going to try to **escape** your system! So what do you do? How do you **enforce** those people to do what you say? Well, simple! You not only control the whole planet in what they get to eat and drink, but you develop a Big Brother system that monitors everything they think! You’ll know who the resisters are! You’re listening in! You’ll make sure they can’t leave your system! But

man, I don't know about you, but good thing we don't see any signs of anybody having the technology to monitor everything we do on the planet all at the same time, how about you? Folks, I'm here to tell you it's already here! They're already monitoring our every move! What we do, where we go, and what we think!

And the **1<sup>st</sup> type of big brother surveillance system** they've already put into place to FORCE US to go along with this One World Government is the **Information System**. You see, you might be out there thinking, "Well hey man, there's no way they're going to get me! I'm not going to go along with this One World Government! I'm just going to unplug from this system and become an anonymous guy. That's right! I'm just going to disappear! They won't find me! Ha! Ha! Ha! I'm free!" Really? Not if they control your **information**! You see folks, whether you realize it or not, there is already in place massive amounts of databases to identify who you are. In fact, they're so big they're called mega-databases. For instance, just one a U.S. company called Acxiom operates one of the world's largest databases on ninety-five percent of all American households. 24 hours a day, they gather and store information on you and I from credit card transactions, magazine subscriptions, telephone numbers, real estate records, car registrations, and even fishing licenses, to name a few. And because of all

this information, **they can provide a full profile** of each one of us, right down to whether we own a dog or cat, enjoy camping or gourmet cooking, read the Bible or other books, what our occupation is, what car we drive, what videos we watch, how much gas and food we buy, and even where our favorite vacations spots are. In fact, it's estimated that, **right now**, each adult in the developed world is **already located**, on average, in **three hundred different databases** with an average of 1,500 data points on you. That's a huge file! In other words folks, Big Brother is already here, yes, even in the U.S.!

But the question is, "Well, how in the world did these guys even get all this information from on in the first place," right? Well folks, believe it or not, there's a multitude of ways they've been getting it from us, and in fact they've even tricked us into giving it up to them **voluntarily!** And the 1<sup>st</sup> way they've done it folks is with those "**loyalty cards.**" You know, those cards they give us at the stores that we shop at, or in the malls, or even the grocery stores. And the premise is, we're saving money in exchange for allowing them to create a massive database on virtually every single thing we buy! But when you look at the facts, we're being lied to! There is no savings! It's a bunch of bologna! Check it out!

Shopping discount card fraud:

Do you have a discount card?

No. What's that.

The Operational Plan.

Here's the plan. Find out what these big companies do with all that prying personal information in their possession after your loyal submission into their club card confederation.

The Targets.

We target two loyalty programs because so many of you have these cards in your wallet.

With a no fee Shoppers Drug Mart Optimum card. Spend money, get points. The promise. Add up points to get free stuff. What do they get from you? Your name, birthdate, address and the ages of your children and all of your spending habits.

At Safeway, the free club card gets you special prices on select items. The promise-to save you money. What do they get from you? A look at the products you buy, connected with your name, address and phone number.

So who benefits from these cards because consumers clearly think they do.

Katherine Albrect: Well we actually in five years of doing this have been unable to find a single consumer benefit from using these cards.

But hold on a second. We thought these cards were all about saving a dime. So we launched..

Project Grocery Bag

We shopped at 4 different grocery stores including a Safeway. We buy the same 10 items in every store.

The tally at the Real Canadians Superstore \$18.38.

Our corner market is almost \$5 more at \$23.15. IGA is just a few cents up at \$23.59. But the big jump comes at Safeway where the total hits \$28.10.

That's almost \$10 more than at Superstore but with the Safeway club card savings the total drops to \$26.22, still more than the other 3 stores, but they tell us we've saved almost \$2 dollars.

Albrect: What we advise people to do is find a store that doesn't have a card. Because we are essentially with our shopping dollars funding this whole monster. We are funding the system. We're funding the databases. We're paying the salaries of the people who are collecting this data on us. We are essentially paying to build our own data prisons here.

Whoa! We've been snookered! So much for saving money! We're paying to fund our own database prison! But that's not all. Another way they get us to offer up our information freely is through **Credit Rating Agencies!** Believe it or not folks, each Credit Rating Agency has files on over 200 million of us here in the U.S. and they not only know our credit history, but they also determine our credit future! They get to "determine" what you "buy" or "sale."...Where have I heard that before?

But that's still not all. They also get us to offer up our personal information through **Credit Card Companies!** That's right folks, there are currently 610 million credit cards in the U.S and of course, they not only know our credit histories, but they also know, "what we buy, when we buy, and when we're likely to default on our payments of what we buy!" And then they adjust our interest rate accordingly.

But that's still not all! They also get our information from **Search Engines!** That's right, all you computer users...you better beware! Listen to this! "Every search you perform on Google goes into the Google's giant database, which it uses to keep a profile of your habits and interests. The

search engine also tracks which links you click on during your search and **then** they use that information to place targeted ads into your browser.” Did you ever wonder why when you were looking for tourists spots in Hawaii on your computer, that all of a sudden adds for airline tickets to Hawaii started popping up everywhere? It’s not by chance! It’s all interconnected! Then, believe it or not, they also use their Gmail service to monitor the content of your email and also place the same targeted advertising into your email account. So you get it at both ends! And then just to make sure they know everything about you, they also record your credit card information, online, your personal account information, and they even track which videos you watch, where you are planning to visit, and what you plan on doing there. In fact, **Google’s co-founder**, Sergey Brin, said their goal is to, “Be like the mind of God.” They want to know everything about you! And, “It’s a future that they’re working feverishly to make a reality now.” And if that wasn’t creepy enough, Google also has location-based map system that allows them to “know where people are in **real time** through the use of smartphones and other GPS-enabled devices.” What? Can they really do that? Yeah, we’ll get to that in a little bit!

But that’s still not all. Another way they get us to offer up our personal information for free is through **Social Media**! You know, Facebook

and Twitter! Aren't they great? Well, maybe you won't think so after this.

Social Media, as we all know, has not only become one of the most important and popular forms of personal communication and personal information sharing all across the planet, but it's also become a gold mine for these database companies to build an entire massive database on every person on the planet! Don't believe me? Let's take a look at where Facebook came from anyway. Sounds suspicious to me. Check it out!

“Do you have a Facebook? Have you thought about the privacy you put at risk. Facebook allows you to post your favorite music, music, movies address, hometowns, phone numbers, email, clubs, jobs, education history, birth dates, sexual orientation, interests, daily schedules, exactly how they are related to friends, upload pictures of themselves and even political affiliations.

It's privacy policy even goes so far as to state it “also collects information about you from other sources, such as newspaper and instant messaging services. This information is gathered regardless of you use of the web site.”

Have you seen the Facebook's pulse feature? Pulse posts statistical trends among universities down to minute details such as percentage of females with conservative views, student body's top 10 movies, and percentage of students who have read *Catcher In The Rye*.

The so called privacy policy goes on to say that they share your information with third parties, including responsible companies with which they have a relationship. Can you think of any marketing group that would pass up buying up such valid but so easily collected statistics such as these and others.

So maybe they're using us. But is there more? Funding came in the form of \$12.7 millions dollars from venture capital ACCEL partners. ACCEL's manager, James Breyer was former chair of NVCA (National Venture Capital Assoc) Breyer served at NVCA board with Gilman Louie, CEO of

InQtell - a venture capital firm established by the CIA in 1999. This firm works in various aspects of information technology in intelligence including most notably, data mining technologies. Breyer has also served on the board of BBN Technologies, a research and development firm known for spearheading the arpanet of what we now know today as the internet.

The IAO (Information Awareness Office) stated its mission was to gather as much information as possible about everyone in a centralized location, for easy perusal by the United States government-including but not limited to internet activity, credit card purchase history, airline ticket purchases, car rentals, medical records, educational transcripts, driver's licenses, utility bills, tax returns and any other available data. All of the above raises more questions than answers."

Unless of course you know what the Bible says. That in the Last Days the Antichrist and False Prophet are going to build the exact same system! Folks, I don't know about you, but it sure looks to me like all this **information gathering** in the Last Days is leading to a total monitoring of our everyday lives, everywhere on the planet, how about you? Forget Facebook...how we call it what it is...TRACEBOOK! Hello! And again, think of the implications here! For the first time in the history of mankind, we can now literally know every single piece of information about every single person on the planet! I mean, gee whiz what's next? Somebody's going to appear on the scene and use all this information against us to FORCE US into going along with whatever they want...us...to...do? Where have I heard that before? Oh yeah, that's right! That's the Antichrist's Big

Brother Society and Control System that the Bible said would appear on the scene when you are living in the Last Days!

But that's not all. The **2<sup>nd</sup> type of big brother surveillance system** they've already put into place to FORCE US to go along with this One World Government is our **Communication System**. You see, you might be out there thinking, "Well hey man, there's no way they're going to get me! Okay, so maybe they're going to grab control all my personal information and build this huge massive database on me to try to pigeonhole me, but hey, I still got my communication devices! I can just "secretly" communicate to people and stay hidden to avoid their radar! They can't get me! Ha! Ha! Ha! I'm free!" Really? Not if they control all **communication**! And folks, the Bible says during the 7-year Tribulation, communication might very well be a matter of life and death! I didn't say that, Jesus did!

**Matthew 24:3,7,9-10** "As Jesus was sitting on the Mount of Olives, the disciples came to him privately. 'Tell us,' they said, 'when will this happen, and what will be the sign of Your coming and of the end of the age?' Nation will rise against nation, and kingdom against kingdom. There will be famines and earthquakes in various places. Then you will be handed over to be persecuted and put to death, and you will be hated by all nations because of Me. At that time many will turn away from the faith and will betray and hate each other."

Now folks, according to our text, Jesus clearly says there's not only going to be a massive rise of wars and rumors of wars and famines and earthquakes in the Last Days but He said what? He said, as we saw before,

there's going to be a massive rise of persecution towards His followers, and we dealt with that for six weeks, and as we saw, it's happening right now! But here's the point. What do they **do** to the followers of Jesus? They not only **hate** them and want to **kill** them, but they are going to **betray** them. Literally "turn them in." And that's exactly what the Greek word means! **Betray** is the Greek word "paradidomi" which means, "to give into the hands of, to give up to the custody of, for judgment, punishment, and/or to be put to death." And so the Bible says during the 7-year Tribulation, the followers of Jesus will be "turned in for death" or literally "betrayed" on a **global** scale.

And so here's the question, "How's somebody going to do this, on a global scale, because that's the context? How are you going to know if somebody's a Christian anywhere on the planet and "turn them in" for death, "betray them" as long as they keep quiet in public and stay out of sight, right?" Well hey, there's no place to hide if you control the **communication!** All you got to do is make one little slip up and talk about Jesus and you're toast! But hey, good thing they we don't see any signs of anybody have the technology to monitor all our conversations anywhere on the planet...any...time...soon. Yeah, right folks! It's already here! They're **already** monitoring every single conversation on the whole planet, for the first time

in the history of mankind! And they started with your **cell phone!** What?

Yeah, that's right folks! It's so commonplace now that even old boyfriends are using against their girlfriends! Check it out!

KGTV The News on 6

Cell phone spying

Cell phones are an essential lifeline for most of us, connecting us to work, family and friends.

But could they be used to spy on you? News of 6 reporter Lori Fullbright has an investigation that will change the way you view your cell phone on tonight's 6 On Assignment.

Fullbright: Well Terry, I met a woman last fall who was being stalked by her ex-boyfriend. She was convinced he was using her cell phone to learn things about her that were private. Well it seemed pretty far fetched and police were stumped.

We started digging and started doing research and we actually did find a way to take control of someone else's phone. We can do all the things her ex was doing-listen to conversations, read text messages, even turn the phone into a microphone; and we can do it from anywhere and the victim would never know.

Carla Robinson's ex has stalked her for three years. Nobody could figure out how he was able to track her every move, her every conversation, especially when he was often out of state. We have discovered though, how her could have turned her cell phone into a high tech snooping device. She allowed us to download the software we found onto her phone. We asked her and a friend to talk over coffee. She's not using the phone, it's just sitting nearby.

Carla: When we first started filing reports on this, the cops told us there was really nothing illegal about what he was doing because the laws were so far behind technology.

Fullbright: I'm a block away in my car listening to every word. I'm hearing

it all through the microphone on her cell phone and she has no way of knowing. As long as they talk, I can hear them.

I could be miles away doing this. Even out of state. I can also hear Carla's actual phone calls. We had her call her mom. Those nearby her can only hear Carla's side of the conversation, but me in my listening post, I can hear both sides.

Carla: Did you remember what you were going to ask me? Oh! You said you talked to Lonnie

<Fullbright inside car listening> Carla's mom responding: Yeah, talked to Lonnie and um he didn't have alot to say except he was going back to work and they've been busy with Brittney's baby and I got some pictures..."

Fullbright: And there's pretty much no way to know if someone's put this software on your phone. One red flag though is your phone will light up periodically throughout the day without really no good reason.

Okay, go ahead and check your phone, because I know you want to! Step on it if it has the red light! But seriously folks, is that creepy or what? This isn't make believe, it's happening now, even to the average Joe! But hey, maybe it's just those nasty old disgruntled boyfriends who do that. I'm sure our Government would never do something like that, would they? Unfortunately, yes! **Right now** folks there is a Global Monitoring Project called Echelon that is a cooperative effort among the United States, England, Canada, New Zealand, and Australia. And under the guise of national security and terrorist threats, it simply monitors and intercepts all **phone calls**, all **faxes**, all **data transfers**, all **radio transmissions** and all **emails**. Don't believe me? Even the History Channel has been exposing it. It's like

we either don't care or we've been conditioned to already accept it! Check it out!

U.S. eavesdropping:

In the name of security societies around the world are struggling to redraw the line between surveillance and privacy.

Bush: The bill before me will help law enforcement to identify, to dismantle, to disrupt, and to punish terrorists before they strike.

Just months after the 9/11 attacks, President Bush, secretly ordered the government to listen in on some American's phone calls without getting warrants. Technically, snooping on people's communications is not difficult. Almost every phone call, fax and email passes through a network of towers and satellites. This digital data can be intercepted with listening dishes or by using spy satellites. The U.S. alone has more than 30,000 eavesdroppers scattered around the world working with at least 100 spy satellites. Every three minutes they collect enough information to fill the library of congress. Governments tell us these technologies make us safer. But where is it all leading?

Ooh! Ooh! I'll tell you! It's leading to the Antichrist's kingdom who's going to monitor everything on the planet! Where have I heard that before? But the question is, "So how does all this communication surveillance technology work?" Well, as you saw on the video, they simply monitor all transmissions via satellites and other means, at the rate of two million per hour looking for key words like "terrorize," or "assassination," or even the word "bomb." But you might be thinking in your conversation like, "That cheeseburger was the bomb!" But here's the problem. If you say "bomb" in your conversation or any other "key" words they're looking for, a hard copy

as well as a recording of that conversation is sent to someone's desk to be analyzed. And you might think, "Come on Pastor Billy. This is just more of that wacko conspiracy stuff. This can't be true. There's no way they would allow this in the United States!" Well, don't take my word for it. Let's listen to Mike Frost who personally worked there for nineteen years, collecting information.

"Communications know no borders. Somebody will pick it up somewhere, and it will end up on somebody's desk...I guarantee it."

Case in point...a lady was on the phone talking to her friend about a school play that she'd been to the night before; her son was in a school play. And she thought he'd done a lousy job, and she said to her friend, 'Boy, he really bombed last night.'

That conversation was highlighted and ended up on an analyst's desk the next morning because the word 'bomb' was in there, and all this lady was doing was talking about her son and his play the night before.

Now that conversation of that lady is held...indefinitely, so if two or three or four years later, she talks about somebody else bombing or something, and the computer spits it out again as being the second or third hit on this person's name, you can graduate from being a possible terrorist to a probable terrorist. It's that easy.

If they say that you are a probable terrorist and passes that information on to those responsible for that sort of activity, just think about what could happen to your life, and you'd never know why.

All of a sudden, your MasterCard doesn't work anymore; All a sudden, your phone is down; all of a sudden, things are falling apart in your life; and you have no reason why, and nobody'll ever tell you.

And he has a warning for anyone who says 'it can't happen to me.'

‘If you don’t want anybody to know about what you’re saying, don’t say it. Because if you do say it, somebody will be listening.’”

Right now we have the technology to **betray** or **turn people in** anywhere on the planet, for the first time in the history of mankind! And maybe that’s what they’ll be doing during the 7-year Tribulation. They’ll change the key word from “BOMB” to “JESUS.” And you’re a probable terrorist! But you might thinking, “Okay, well that’s it! I’m just turning it off! They ain’t going to get me! They’re not listening to my conversations! I’m just turning my cell phone off right now!” Well, believe it or not, not even that works anymore!

Fox News:

Smith: If you power down your cell phone there’s no way the government could ever hear you. Certainly not the F.B.I., it’s turned off right? Have we got news for you. Alright, here’s that cell phone story you’ve been waiting for. Cell phone users beware. Big Brother maybe listening. The Federal Bureau of Investigation can now hear everything you say-even when the cell phone is turned off. I know, it sounds kinda out there, but using your phones tracking device, authorities can now activate the microphone inside the dreaded thing-allowing them to eavesdrop on you and your conversations.”

Wow! So much for personal privacy and private conversations! Aren’t you glad everybody’s been pushing for everyone on the planet to have cell phones, even kids, and if you can’t afford one the Government will buy you one...for...free.” Hmmm, I wonder why? Great way to **monitor** everyone, isn’t it? Folks, correct me if I’m wrong, but it sure looks to me like all this

**communication technology** is leading to a total monitoring of our everyday lives, for the first time in the history of mankind, how about you? Anywhere on the planet! You can't hide! I mean, gee whiz, the next thing you know, somebody's going to appear on the scene and use all this communication technology against us to FORCE and/or BETRAY us into going along with a One World Government. Where have I heard that before? Oh yeah, that's right! That's the Antichrists kingdom and Big Brother society that the Bible said would appear on the scene when you are living in the Last Days! Folks, what more does God have to do? This is not a game! This is real! God doesn't want us going into the Antichrist's kingdom, and He certainly doesn't want us to go into HELL! And so that's why, out of love, He's given us these signs of a **One World Government** to show us that the Tribulation is near, Christ's 2<sup>nd</sup> Coming is rapidly approaching. And that's why Jesus Himself said:

**Luke 21:28** "When these things begin to take place, stand up and lift up your heads, because your redemption is drawing near."

People, like it or not, we are headed for **The Final Countdown**. And so the point is this. If you're here today as a Christian, it's time to get busy! We've got to lay aside our differences and start getting busy working together saving souls by the Spirit of God! Amen?

But if you're here today and you're not a Christian, then I beg you, please, heed the signs...heed the warnings...give your life to Jesus today...because the last place you ever want to be is in the **Antichrist's Kingdom**. But if you don't wasn't to listen to God's warning, then maybe you should listen to the warning from the news! They're already admitting this is what's coming in the next few years!

Biometrics in 2017:

Brian Williams: More now on our special coverage here tonight. Life in the U.S in ten years time. By that time, there may be all kinds of new ways to safeguard and identify all those things that make each of us unique; our faces, even our fingerprints, even our eyes. Here now with more on the future of technology, NBC's Tom Costello.

Costello: The year is 2017. You're rushed to a hospital, unconscious with no ID or medical history but thanks to a microchip under your skin, it's all there. Science fiction 20 years ago, but a biometric reality today.

Clark Nelson of Sagem-Morpho Biometrics: The technology is based on answering one simple question: Am I who I say I am?

Costello: Already, fingerprints and iris scans verify passenger identities at airports. Within 10 years, that technology may be even more widespread. Look for more complex facial recognition programs that scan a crowd of thousands looking for a single terrorist. Today's facial recognition software starts with eyes, then it maps out the contours of the face and compares that against a database of millions. A database that's growing by the day. What's next? At the University of Bath, in England, researchers predict big changes for consumers.

Professor Don Monro: I think it is possible to free us completely of our wallets and keys by using biometric technology if that's what people want in 10 years time.

Costello: In fact, it's already here. The latest home security locks use fingerprints to control deadbolts. And at the Jewel-Osco grocery store in Chicago, some customers pay using their fingerprints. No paper or plastic.

Ayanna Grady: You don't really need anything other than your hand and you already got that with you.

Costello: So will future department stores scan our iris's like in the movie *Minority Report*, then offer products catered to who we are.

<movie clip> Hello, Mr. Yokamoto! Welcome back to the Gap!

Costello: Experts say that technology is here now. The challenge is to safeguard our privacy in a brave new world."

You don't really need anything but your **hand** to buy or sell and you already got that with you. Folks, this is not make believe. This is happening right now. Right now we're already being conditioned to accept the Mark of the Beast in your hand, and if you're not saved, you better get saved **now**... Let's pray.

---

To find the way to God, to understand the *truth* of God's Word, and to receive the gift of eternal *life*, begin by repentance and faith through a prayer like this:

"Dear God, I understand that I have broken Your Law and sinned against You. Please forgive my sins. Thank You that Jesus suffered on the cross in my place. I now place my trust in Him as My Savior and Lord. In Jesus' name I pray. Amen."
